

IIG Varsity

E/43, Invocity Ave, iHub, IT Park, Sailashree Vihar
Patia, Bhubaneswar 751024

Name of the Student _____

Test: **IIG-FND-008**, Time: **2 hours**, Date: **23-09-2022**

HTML / JAVASCRIPT

(Answer any five questions. No step marking)

Mark: 100

Upload the program to your GitHub repository in your respective folder at
<https://github.com/milandas63/IIG-batch1>

1. Write a program to take a text from the user and print the sum of all ascii value of each character in the text?

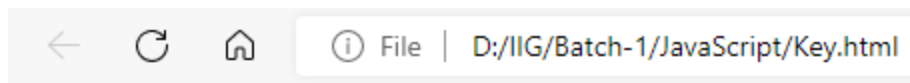

2. Create the following table and reverse the characters of each cell in the given table on clicking a button:

SLNO	COUNTRY	CAPITAL	CURRENCY
1	Afghanistan	Kabul	Afghani
2	Argentina	Buenos Aires	Peso
3	Brazil	Brasilia	Real
4	Canada	Ottawa	Dollar
5	Denmark	Copenhagen	Danish Krone
6	Guinea	Conakry	Franc

3. Write a program to print the current time now in HH:MM:SS format?
4. Write a program to count the number of words in the text entered by the user?
5. Write a program to check if the name entered in an INPUT element is valid?
6. Write a program to display a table with 10 rows in the following columns:
(a) Name of the student input-text
(b) Name of the college input-text
(c) Gender radio-button
(d) Highest qualification combobox

Provide a REVERSE button at the bottom the table. On clicking the button, the table data will be reversed **horizontally** only.

7. Write a program to display the content of an INPUT text box at the bottom of the box in upper-case. Update on every key press? See the illustration of the browser page given below:

Enter Text Data
